

MATERIAL PRESSURE REGULATOR

The DAV Tech material pressure regulator is used for regulating fluid pressures by hand.

They are available in pressures areas from 0 - 7 bar, 0 - 25 bar and from 0 - 50 bar. These regulators are manufactured from stainless steel. In this way they are suitable for most of fluids f.i. glues, adhesives, colours, paints, release agents, oils.

The diaphragm is made from Viton®, resp. the material side of membrane is made from PTFE. The diaphragm of the regulator 0 - 50 bar is additionally manufactured with a special tissue.

The valve balls are made from ceramics.

TECHNICAL DATA

Modello	MATERIAL PRESSURE REGULATOR
Membrane:	Viton® / PTFE
Gasket material:	Viton®
Incoming pressure:	0 - 7 bar = max. 40 bar 0 - 25 bar = max. 40 bar 0 - 50 bar = max. 70 bar
Gauge:	stainless steel ø 63mm
Connections:	1/2"
Material:	Stainless steel
